Dear Hiring Manager,

I am writing to express my interest in opportunities within your organization. With over 7 years of experience in software engineering, I have contributed to building scalable, high-performance applications and delivering reliable, maintainable solutions. I bring a strong focus on problem-solving, product quality, and creating technology that addresses real user and business needs.

Currently, I work as a Senior Software Engineer at Sprinklr, where I contribute to the CXM Studio module by developing and integrating features and improving application stability. Previously, at Bolster AI, I helped deliver impactful solutions, including a Chrome extension that reduced SOC analysis time by over 80% and a Typosquat module that scaled to more than 13,000 active users. These experiences strengthened my ability to solve practical problems and contribute to products used at scale.

Throughout my career, I have collaborated with cross-functional teams, contributed to engineering initiatives, mentored developers, and promoted practices such as unit testing, accessibility, and maintainable code. My experience at TCS on Microsoft projects further developed my ability to work within enterprise environments and deliver dependable solutions.

I am interested in opportunities where I can apply my technical experience, adaptability, and collaborative approach to meaningful challenges. I would welcome the chance to discuss how my background and skills could support your team and organization.

Thank you for your time and consideration. I look forward to the opportunity to speak with you.

Best regards,
Abhishek Tomar
